DISCUSSION OF THE AMENDMENT

The specification has been amended on pages 10-13 and in the drawings. The amendment is for matters of form such that the reference numerals of the second and third embodiments of the invention described on pages 10-13 of the specification are the same as the reference numerals provided on the corresponding figures. Support for the amendment is found in original Figure 1 and throughout the specification.

Applicants thank Examiner Doung for the helpful and courteous discussion of November 2, 2006. Applicants submit that the present amendment obviates any lack of clarity with respect to the reference numerals of the specification and the corresponding reference numerals of Figures 2 and 3.

Applicants request allowance of all now-pending claims.
